REACH

Declaration of Conformity (EG 1907/2006)

As a manufacturer of presentation systems, ARNO GmbH is classified as a downstream user in terms of REACH. According to REACH, the products are complex objects and are not subject to registration according to Article 7.

As a downstream user, we use substances for further processing in our products that are pre-registered or registered and authorised. In our own interest and in the interest of our customers, we are in dialogue with our suppliers to ensure that all products supplied are REACH compliant.

ARNO GmbH fulfils the obligation to inform its customers according to Article 33 and confirms that at present and to the best of its knowledge, no substances on the ECHA candidate list (Article 59 (1)) are contained in its products in a proportion of more than 0.1% by mass.

Exceptions to this rule may be the connecting elements we use, but these play a subordinate role or are negligible.

Complex objects made up of several products can be joined together mechanically (using fasteners such as sockets, bolts, etc.) or with the help of a material. The fasteners we use (sockets, welding and connecting studs, etc.) may contain more than 0.1% lead by weight.

No special precautions need to be taken when using our products.

Wolfschlugen, July 2024
